

# DKSF Rotation Angle Setting Table

Because stopper bolts are not mounted on DKSF as of shipping, it rotates 360° .  
 Mount the included stopper bolts to restrict the control panel rotation angle.  
 Use two stopper bolts to set the rotation angle.  
 When restricting the rotation angle to 315° , use only one stopper bolt.

## Relationship of control panel rotation angle restriction pattern and stopper bolt/locating disk

Rotation direction	Horizontal rotation		
Locating disk (control panel) rotation angle	<p>45° 45° Stopper Bolt Locating disk 90°</p>	<p>60° 60° 120°</p>	<p>75° 75° 150°</p>
	<p>90° 90° 180°</p>	<p>135° 135° 270°</p>	<p>As of shipping 360°</p>

Rotation direction	Right rotation (clockwise)	Left rotation (counterclockwise)
Locating disk (control panel) rotation angle	<p>45° 45°</p>	<p>45° 45°</p>
	<p>75° 75°</p>	<p>75° 75°</p>
	<p>240° 240°</p>	<p>240° 240°</p>
	<p>270° 270°</p>	<p>270° 270°</p>
	<p>315° 315°</p>	<p>315° 315°</p>

- The figure shows DKSF as seen from the bottom. The figure in the table shows the reference positions of the stopper bolts and locating disk.
- The rotation direction when seen from above is the reference.
