

SNSU-AT Socket Head Cap Screws - SUH660

Heat-resistance High strength High Specific Strength SUS Stainless steel

● Material/Finish

	SNSU-AT
Main Body	SUH660 (Equivalent to A286)

● Mechanical Properties

	SUH660
Tensile Strength (N/mm ²)	900 or Higher
0.2% Proof Load (N/mm ²)	590 or Higher
Elongation (%)	15 or Higher

- Mechanical properties are those with solution heat treatment + age hardening material.
- Values in chart are for reference only. They are not guaranteed values.
- Do not exceed the max. tightening torque.
- Always carry out tests under performance conditions similar to actual conditions in advance in order to confirm safety.

- SUH660 hex socket head cap screws.
- SUH660 is heat-resistant austenitic steel equivalent to A286 (ASTM standards), which is mainly used in high-temperature environments.
- The heat resistant temperature is 700°C. Retains high strength even in high temperature environments.
- The strength per each screw is high, so smaller screw diameters and reduced quantities are available to save space and reduce weight.
- For high-specific strength screws which can be made smaller and lighter-weight, see “What is specific strength?”.

● Application

Lighter-weight automobiles, aircrafts/aerospace equipment, robots, etc.
Semiconductor manufacturing equipment / gas turbines/steam turbines / coal-fired generating plants
